Subject miscellaneous cleanup

Hi Tom:

Yesterday I mentioned that it would be good if someone looks at the December 2005 BHP application and prepares an errata sheet for errors. I think these are either typos or require an explanation. Here are some examples:

- reference to bio-diesel fuel, see page DW page 1, Appendix A. There is no bio-diesel fuel in this project.
- percent of diesel and gas fuel mixture (1%+ 99%, 0.6% + 99.4%, 0.006% + 99.4%) -- see FSRU pages 1, 2, and 5 of FSRU tables in Appendix A. If the basis for % are different (e.g, heat, versus volume versus weight, then also show normalized units or correct them for consistency). Further, these numbers must be consistent with numbers in the text.
- tank size (144,500 & 145,000 gal) -- see page 14 of Appendix A -- or there should be a note regarding differences.

The above examples are errors I have noticed to date -- there may be others.

As I suggested, I hope a simple QA of the entire document will find these minor errors and with an errata sheet to the application we don't have to explain these minor errors, if/when we get questions.

Thanks for your help.

P.S. Please also send me the estimated time line for sequence of construction events.
